

# **THE 2 PROFITABLE BUSINESSES YOU CAN RUN WITH LITTLE START UP CAPITAL**

## **INTRODUCTION**

Before you continue, I want to tell you that you are about reading what will liberate you at the moment.

I will only discuss 2 out of the seven, and I will only be giving a short discussion. I will give you the basic information, you can then go ahead and learn more on your own.

These type of businesses are known by few who have chosen the right decision to become a millionaire. What am I saying in essence;

My point is this business can make you at least N300,000 a month with a capital not more than 50,000 maximum. You don't even require any start up capital for some.

Get this into your brain: Money is everywhere, it is left to you to locate and be in control of those money.

You do not have any excuse for your being broke at the moment, because you are about getting what will change your life.

Even with all these, a lot of people will still not read this report. A lot will read and will not implement it. But since you have read to this stage, I believe you are one of the few people that will read and implement it.

## **BUSINESS 1**

### **SELL INFORMATION BASED PRODUCTS**

This may actually sounds unfamiliar, or probably you have heard about it before and you don't know how to go about it. Then you are in the right place.

Have you thought about how some people continue to get richer and the others poorer?. It is simply because the rich ones know what to do per time to get more money. If you want to make it fast and hit it big. Then selling information product is the way.

### **Let me explain better**

Do you know a lot of people out there needs helpful information from you and I?. They need these informations to help them solve a number of challenges they are passing through. And the painful thing is that most of this information are not taught anywhere.

Let me give examples

- How to loose body fats with these home remedies
- How to sell information online
- Why women cheat; what everyman should know
- How to fight weak ejaculation.
- How to treat infertility in men and women
- How to turn yourself into a Live Breathing Cash Machine. The list goes on and on

A lot of people out there are ready to pay huge money for these piece of information, if only you can deliver it to them at the right time.

I know someone who wrote a report on how to buy low cost laptops and phones online and the person is now a millionaire just for that report only.

The person sold over 500 copies at N4,000 per copy. If you do the calculation, that is about N500,000 per month. Yes, you got the calculation right....It is as good as that. That is what I do now.

**PS: The information you sell may not necessarily be from your personal Experience.**

It can be what you learnt from people over time, or a product of your constant research. I know of someone who got access to a piece of information about

wooing a lady. He didn't write the report. The report was about 10 pages. He sold 50 copies at N1500 each of which he only spent N6500 running an advert

Note the following:

Whatever information you are selling must;

- Help people overcome a problem or challenge
- Help them achieve a hot desire

You can't just come up with anything and say you want to sell.

**There are many areas where most information are sold**

E.g include topics relating to...

- Dating, Marriage, Relationship
- Health, Fertility, Weight loss, Sexual issues
- Business, Investment, and Finance

**There are sub-categories as well**

Let us use business to illustrate

Under business, we have marketing

Under marketing, social media marketing

Under social media marketing, we have Facebook and Instagram marketing and so on.

**IN CONCLUSION**

Selling information product involve these 3 basic steps:

- Decide on a topic that people will buy
- Create the information into a product
  - This can be done in form of a PDF or simple eBook
  - You can also sell as a video too

But I prefer the PDF format because it is easy to create

- Create a system to market the information.

- This can however be done in Various ways
- But the one that has been working for me is through creating web pages and then running a Facebook advert. It is usually in this format;
- Facebook advert--presell--optin—salespage

This is just a tip of an iceberg. I can't begin to give you every information now. If you need more information, just get the recommended book and read.

## **BUSINESS 2**

### **REAL ESTATE MARKETING**

This involves making commission by marketing real estate properties e.g. lands and houses. Please note that you are not doing it the local way like most house agents do

#### **STEPS TO TAKE:**

- Sign up with one of the real estate firms who have a solid system in place.
- After signing up, you have the opportunity to train with them. So that you can learn how to go about selling the properties (Realtors)
- Sometimes, there is a system where you can bring other people to work for the company and you also make some commission on the properties sold by the people you brought. It is as simple as that.

Majority of real estate companies give a commission of 20% on each sale.

Assuming a plot of land is N1M and you sold 3 plots of land in a month..

That is (3 x 200,000commission) which is N600,000 income per month, which is not achievable with the salaries of most people out there

All you need to do is to get started with at least one of the businesses.

I will recommend you start with **Business 1** because that is what I do presently.

And the interesting thing is that, it only requires little start up capital.

On a final note, this report however is not a full training. It is just to give you insight on how to get started.
